

AMENDMENTS TO THE SPECIFICATION

Please replace paragraph [0032] of the specification as originally filed with the following rewritten paragraph.

-- The flexible film 16 has an exposure hole 16a, circular in plan view and opening the upper portion of the metal belleville spring 14a (See FIG. 2), with the lower end portion of the pushing member 10b ~~10b~~ of the lower key top 10 being situated in the hole (within the thickness of the flexible film 16). Further, in the periphery of the exposure hole 16a, there are formed upper contacts 16b (see FIG. 2) respectively corresponding to the four lower contacts 14c and wiring (not shown) for the upper contacts 16b. --
